FREE CONTINUING EDUCATION EVENT

Preventing Sudden Death in Sport and Physical Activity: An Emphasis on Exertional Heat Stroke

FRIDAY, SEPTEMBER 29, 2023
9:00 – 11:30 AM
KHS-199
CAL STATE FULLERTON CAMPUS

Dr. Douglas J. Casa, PhD, ATC,
FNAK, FACSM, FNATA
CEO of the Korey Stringer Institute
(KSI) and professor of Kinesiology
at the University of Connecticut

LEARNING OBJECTIVES:

- Identify the top reasons why athletes die suddenly in sport
- List and identify current best practices for the prevention of sudden death in sport
- Compare accuracy of various temperature assessment devices for exercising individuals and cooling modalities to use in the event of exertional heat stroke
- Identify strategies for implementing policies to keep athletes safe during sport and physical activity
- Compile resources available for dealing with possible causes of sudden death in sport
